**GENERAL NOTES:**

1. Offerors should assume areas shaded green will be excavated - boundaries are approximate only.
2. Areas shaded green reflect shallow excavation approximately 1 to 3 feet deep.
3. See other project drawings for foundations and utilities to be removed.
4. While the sanitary sewers and process piping under and around B5 appear to be in good condition, Offeror should assume that some soils around these and other utilities may be contaminated, but *not* as mixed low level waste (MLLW).
5. For purposes of bidding, Offerors should assume that trenches for existing utilities were constructed 3 foot deep by 3 foot wide.
6. See Price Proposal form for assumed soil volumes.

**ADDENDUM #3 - OLD TOWN DEMO Ph-1**  
Conceptual Areas for Grading/Excavation  
August 8, 2014

B40

B41

Remove sump at B52 and circular steel secondary containment tanks at B5 to bedrock. Excavation and layback required to approximately 12' below grade.
